Lab 8 Activity – MongoDB

4. Using the students collection, find the average marks scored by each student.

```
db.students.aggregate([ { $group: { _id: "$Name", averageMarks: { $avg: "$Marks"
} } } ]);
```

```
schoolDB> db.students.aggregate([
...    {
...       $group: {
...          _id: "$Name",
...          averageMarks: { $avg: "$Marks" }
...       }
...    }
... ]);
[
  { _id: 'John', averageMarks: 87.5 },
  { _id: 'Emily', averageMarks: 80 }
]
```
